Useful information

Category : Discovery and recreation

Rating : No rating

Description

It was set up in the entity forest in 1914. The topographical description of the place is a plateau high 420 meters with a light declivity of about 5% towards North-West. It is wide 4 Ha and 70 a, and it contains nowadays no fewer than 81 species, from the temperate regions of Europe, North America and South-Eastern Asia. It has a very high aesthetic value thanks to the age, the quality and the diversity of wood, and also to the layout of the path in star. You have access to it by going towards the Sainte-Barbe chapel and then towards the Chateau des Fées castle. The arboretum is located on the B1 and B2 walks on the IGN map called "Bertrix - Herbeumont" (Text source by MT Bertrix Semois)
