Rating : No rating

Description

The panoramic view from the top of the church tower, approximately 50 meters from the ground, offers a unique perspective on the surrounding area: 800 km² for you to explore! On the Sinemurian cuesta, Florenville has a beautiful viewpoint, just behind the church. Sit on a bench and admire this landscape in peace and quiet.

Among other things you will observe a wide meander of the Semois with the Ardennes forest behind. The viewpoint indicator behind the church will explain the different elements of this remarkable landscape. For further explanations, visit Paysalia, the Landscape Interpretation Centre, on the first floor of Florenville tourism office and see its visiorama.
